Project Title	Manufacturing Unit for Palm Oil
Market Scenario	<p>Worldwide there is a huge potential for Palm Oil with large-scale estates developed in Malaysia, Indonesia, West Africa and Latin America. Malaysia (13 million tons) and Indonesia (10 million tons) are the major producers and exporters together account for 85% of production.</p> <p>India is one of the largest importer and consumer of edible oils worldwide. The Country is dependent on Palm Oil imports to the extent of 25% of its annual edible requirement. India imports nearly 3 million tons of palm oil per annum (mainly from Malaysia, followed by Indonesia).</p>
Suggested Locations	<p>Oil palm fruits are highly perishable and, processing facilities are necessary for producing good quality oil. The fresh fruit bunches have to be processed within 24 hours. East godavari, West godavari, krishna are the best suitable locations in the state. Presently there are six units in east godavari in the state hence there is a good market potential.</p>
Estimated Capacity	<p>10,000 tonnes per annum</p> <p>It is estimated that at least three such units could come up at the identified locations.</p>
Estimated Cost	<p>INR 150 million (USD 3.33 million) per project</p>
