Background:

Kurnool district is one of the important districts in the state of Andhra Pradesh and the most prominent district of the Rayalaseema Region. The name of Kurnool has been derived from its original name of 'Kandenavolu'. Consequent on the formation of Andhra State on 1st October 1953, Kurnool became its Capital and continued to be so till 1st November 1956, when Andhra Pradesh was formed. The district is strategically located on one of the important National Highways, N.H.7 and N.H. 18. The district headquarters, Kurnool town is 200 Km. away from the state capital, Hyderabad. Kurnool district is gifted with rich natural resources. The district is bounded on the North by major rivers of Krishna and Tungabhadra. One of the largest Hydro-Electric Power Project is constructed across river Krishna at Srisailem.

Nallamalas and Erramalas are the two important mountain ranges in the district running parallel from North to South with thick vegetation. About 18% of total geographical area is under thick forest cover which is a rich source of forest wealth. The major portion of the district comprises rich black cotton soil which is being cultivated aptly for growing rich cash crops like Groundnut and Cotton. Kurnool district is also endowed with rich mineral resources

Resources:

Agro Resources:

Kurnool district has got a strong agricultural background. About 70% of the working population of the district is either directly or indirectly engaged in agricultural and allied activities. The major cash crops like cotton, tobacco and groundnut are extensively grown. Other principal food crops are jowar, bajra, paddy.

Horticulture

About 5% of the geographical area of the district is under various horticulture crops. The potentiality for horticulture produce in different mandals is as follows:

1. Mango - Bandi-Atmakur, Orvakal, Peapully, Betamcherla, Kodumur, Mahanandi, Kallur, Dhone, Panyam, Veldurthy, Banaganapalli.
2. Citrus - Kurnool, Kallur, Krishnagiri, Chagalamarri, Allagadda, Gonegandla.
3. Guava - Kallur.
4. Banana - Mahanandi, Rudravaram, Chagalamarri, Kothapalli Atmakur, Nandyal, Allagadda , Panyam.

5. Sapota - Panyam
6. Tomato - Adoni, Alur, Aspari, Pathikonda, Devanakonda, Tuggali Maddikera.
7. Onion - Atmakur, Orvakal, Peapully, Betamcherla, Kodumur, Mahanandi, Kallur, Dhone, Panyam, Veldurthy, Chagalamarri, Pathikonda, Jupadu-Bunglaw, Gudur, Kosigi, Mantralayam. Rudravaram, Kothapalli, Gonegandla, Yemmiganur, Nandyal, Allagadda.

WATER RESOURCES:

Tungabhadra: The Tungabhadra River rises in the Western Ghats and after forming part of Northern Boundary for some distance and separates Kurnool from the Telangana Region flown in an Eastern direction and falls into Krishna River.

Hundri:

The Hundri, a tributary of Thungabhadra rises in the fields of Maddikera receives a stream from Erramalas at Laddagiri in Kodumur Mandal and joins Thungabhadra at Kurnool. It drains much of Maddikera, Pathikonda, Devanakonda, Gonegandla, Kodumur and Kallur Mandals. This is turbid stream with sudden and fall.

Kunderu River:

The Kunderu also called ' Kumudvathi' rises on the western side of Erramalas, winds its way into Kunderu Valley and flows in a southern direction, collecting drainage all along its course, from eitherside. It flows through Orvakal, Miduthur , Gadivemula, Nandyal, Gospadu, Koilkuntla, Dornipadu and Chagalamarri Mandals and then enters Cuddapah District.

Scope for resource based industries:

Basing on the availability of the above resources and infrastructural facilities available in the Kurnool district the following industrial activities are suggestive of units of resource based, Demand based and Candidate based in the potential area with a view to help the prospective entrepreneurs as well as existing entrepreneurs.

- I) Mineral resource units
- II) Agro based units
- III) Horticulture based units

SPONGE IRON UNITS:

The Mineral resources of this district would be turned as principal resource of Limestone and Iron ore as there is good qualities of limestone and iron ore with content of 50% to 60% Fe which are main raw materials for establishment of SPONGE IRON UNITS one or two units at Ramallakota area and Veldurthy area where there are good deposits estimated of 4.5 Million tones.

CEMENT UNITS:

Further it is suggested for two more Cement Manufacturing units at Kanakadripalli, Ankireddipalli, Ramallakota, Bethamcherla area as there are large sources of Cement grade limestone useful for Cement Industries in this district. It is estimated deposit of 3.25 Million tones in the area shown above.

FOOD PROCESSING UNITS:

The favourable factors like Horticulture products can be grown with little irrigation facilities and also this Kurnool district falls under category of Horticultural crops as there is product of Mango fruits i.e, Benesha variety which is grate demand in India as well as in the middle Eastern Countries. The product of this crop is very high and the product such variety is nearly 23000 MTs per annum at Banaganapalli, Mahanandi, Ramallakota, Veldurthy areas in this district. So there is

good scope for establishment of one or two fruit processing and fruit canning units like Mango pulp, Guava pulp etc, The food grains like Maize, Jowar, Rice, Groundnut etc., are food crops grown in this district. As there is good potential for Maize crop, there is good scope for establishment of Ethanol unit at Nandyala area.

Industrial Scenario:

The District is having 39 Large and Medium Industries with an investment of Rs. 909.00 crores. Major Industries in the District are Sree Rayalaseema Alkalies and Allied Chemicals Ltd, Heritage Foods (India) Ltd etc.
